DESCRIPTORS: *Urea, Urea derivatives, *Glucosides,
Synthesis, Diuretics.

The glucoside of urea can be easily obtained in water-
alcohol medium in the presence of a small quantity of
HCl. In this way well-formed crystals are obtained of
a high degree of purity. The reaction can also be
carried out in acidified 95% ethyl alcohol, however,
in view of the poor solubility of glucose in alcohol this
method has no advantages. (Author)

This volume deals with one of the large taxonomic
 divisions of the Decapoda, viz., the Anomura, the
 hermit crabs. In the introduction, a short anatomo-
 morphological outline and also very succinct data are
 given on the biology and zoogeography of the Anomura.
 Owing to its specific character, the data on the family
 Paguridae are preceded by a special introduction, in
 which its anatomy is examined in greater detail, while
 in the general introduction, the external morphology and

The present volume is an attempt to provide the reader,
first of all, with a practical aid in identifying predatory
animals and, secondly, with basic data on their mor-
phology, distribution and biology, to familiarize the
reader with this subject, and at the same time to en-
courage him to acknowledge the as yet unsolved prob-
lems on which attention must be focused. To facilitate
